

# energy measures

fact file

1

## Getting Started

This first fact file in the series, tells you more about the Hospitable Climates programme.

The Fact File will help you to:

- understand the benefits you will receive from participating in the programme;
- understand the best way to manage energy within your specific business (this may be through an energy management committee in larger hotels, but under the direction of the owner in smaller establishments);
- complete a preliminary review of the energy consumption of your business;
- understand the type of energy savings you could make compared to other similar businesses, and
- submit an assessment of your current energy consumption to the Hospitable Climates secretariat at HCIMA.

There are three versions of this fact file and you will be sent the one most suitable for your business - Accommodation providers; pubs; catering and restaurants.

If you require any of the others please contact [hospitableclimates@hcima.co.uk](mailto:hospitableclimates@hcima.co.uk)
