

# energy measures

fact file

**4**

## **Lighting & Lighting Controls**

### **Making immediate savings from lighting and lighting controls**

Focusing on the issue of energy, this fact file includes two simple checklists that will help you to reduce your total electricity bill by up to 13% immediately. The Fact File provides step-by-step guidance on reducing lighting costs which is relevant to all hotels (even those that already have energy efficient lighting installed). The fact file also provides information about the levels of lighting required to satisfy health and safety requirements.

By implementing the recommendations included in the Fact File, you will:

- make immediate savings by making more efficient use of existing light;
- understand the types of energy efficient lighting most suited to different parts of your property;
- be able to install energy efficient lighting solutions into appropriate parts of your property.
