Laundry and Dry Cleaning

Energy Efficiency in laundries and dry cleaning operations

Laundry areas can account for up to 8 per cent of total energy consumption in larger hotels, schools, hospitals or similar businesses. This fact file will help to ensure that laundry operations are as efficient as possible by:

- Establishing some basic principles to help staff take immediate actions to tackle energy wastage
- Helping the laundry manager/supervisor establish a preventative maintenance programme and detect and repair faults promptly
- Improving energy efficiency by installing low cost technologies.
